2 Intersection of Droubay and Smelter Roads	0.6	5,081	N40 32.422	W112 16.443
3 Intersection Droubay Road and 1000 North	1.4	4,961	N40 33.073	W112 16.453
4 Intersection 1000 North and Main Street	2.7	4,871	N40 33.068	W112 17.916
5 Intersection 1000 North and 600 West	3.7	4,772	N40 33.038	W112 19.037
6 Mid Valley Trail Trailhead	4.6	4,779	N40 32.728	W112 19.732
1 Oquirrh Mountain Trail Trailhead	9.2	5,206	N40 31.910	W112 16.463

Trail Description: Due to heavy traffic and predictably poor motorist awareness, Tooele City's Main Street is no safe place for bicyclists who are on a pleasure ride, or are commuting to work or to shop. Which presents a problem: how do you get around Tooele on a bicycle without risking life or limb on Main Street? Fortunately, Tooele has several alternative streets from which to choose, like 100 East or 100 West for north/south travel. Tooele also has the "Cross Town Trail," which runs from the Oquirrh Mountain Trailhead on the city's southeast side, to the Mid Valley Trail Trailhead on the northwest side—without using Main Street. And if you're going south to north, it's all downhill. **The trail begins** at the Oquirrh Mountain Trailhead (**Waypoint #1**) next to Oquirrh Hills Golf Course and proceeds north on Droubay road for 0.6 mile to Smelter Road (**Waypoint #2**) and then 0.8 mile to 1000 North (**Waypoint #3**). Turn left onto 1000 North and proceed west for 1.3 miles to the intersection of 1000 North and Main Street/SR-36 (**Waypoint #4**). There is a stoplight. Continue west on 1000 North for one mile to the intersection of 1000 North and 600 West (**Waypoint #5**) and turn left. After heading south for 0.25 mile, 600 West veers to the right and becomes Rogers Lane. Continue west for 0.65 mile to the Mid Valley Trailhead on the left (**Waypoint #6**). To return to the Oquirrh Mountain Trailhead, turn back and retrace route. What are the laws for safe bicycle travel in Utah? According to the Utah Department of Transportation, Utah law defines bicycles as vehicles and its operators must comply with Utah traffic laws. In summary they are: 1. Ride with the traffic flow and as far right as conditions safely allow. 2. Use turn lanes when available. 3. Obey all traffic signals including stop signs and lights. 4. Have at least one hand in control of your bicycle at all times. 5. Use bike lanes whenever possible. 6. Yield the right-of-way to pedestrians. For more information on Utah's bicycle laws and tips for riding safely in traffic, go online to www.udot.utah.gov and enter "Utah Bicycle Commuter Guide" in search window.
